

Merger to form MAN Diesel & Turbo SE complete

Augsburg, 26/03/10 – The merger announced between MAN Diesel SE and MAN Turbo AG to form MAN Diesel & Turbo SE, based in Augsburg, is now complete, the corresponding entry having been made in the register of companies. The process of amalgamating the two former MAN sister companies into one enterprise has thus been achieved. In economic terms, the merger has come into effect retroactively as of 1 January 2010.

By combining the complementary product portfolios of the two firms, the merged company will be striving for growth and looking to strengthen its position in the relevant market segments. "The merger now having become effective, the MAN Group will be seeking to pool its expertise in large bore diesel engines and power plants with its strengths in compressor and turbine technologies," is how Klaus Stahlmann, MAN Diesel & Turbo SE's Chief Executive Officer and member of the Executive Board of MAN SE, comments this step. MAN Diesel & Turbo will henceforth be in a position to offer its customers product packages, such as turnkey DCC (Diesel Combined Cycle) power plants, for example, or waste heat recovery systems for maritime applications. As well as expanding the product range, the merger will also create synergies and offer further benefits, for instance in respect of costs. Joint global purchasing or the joint use of existing production, sales and service sites are just two examples of this.

Together with RENK AG, MAN Diesel & Turbo will form a strong, Strategic Business Area "Power Engineering" within the MAN Group.

About MAN Diesel & Turbo

MAN Diesel & Turbo SE, based in Augsburg, Germany, is the world's leading provider of large-bore diesel engines and turbomachinery for marine and stationary applications. It designs two-stroke and four-stroke engines that are manufactured both by the company and by its licensees. The engines have power outputs ranging from 47 kW to 87 MW. MAN Diesel & Turbo also designs and manufactures gas turbines of up to 50 MW, steam turbines of up to 150 MW and compressors with volume flows of up to 1.5 million m³/h and pressures of up to 1,000 bar. The product range is rounded off by turbochargers, CP propellers, gas engines, engines for locomotives and chemical reactors. MAN Diesel & Turbo's range of goods includes complete marine propulsion systems, turbomachinery units for the oil & gas as well as the process industries and turnkey power plants. Customers receive worldwide after-sales services marketed under the MAN PrimeServ brand. The company employs around 12,500 staff at more than 100 international sites, primarily in Germany, Denmark, France, Switzerland, the Czech Republic, Italy, India and China. MAN Diesel & Turbo is a company of the Power Engineering business area of MAN SE, which is listed on the DAX share index of the 30 leading companies in Germany.
